Read the given passage and answer the six questions that follow.

As the weather changes, everyone is prone to colds and coughs. While we have all heard about the benefits of vitamin C for colds, few of us are aware of a secret solution - Zinc! Zinc is helpful as it can reduce the severity and duration of respiratory tract infections. It soothes sore throats with its anti-inflammatory properties. It plays a pivotal role in supporting various functions of the body like the immune system, wound healing and maintaining overall health. It prevents viruses from growing in the body. Zinc is also known to boost the immune system and fight infections.

Notably, zinc is a vital mineral found in a variety of plant and animal foods. When consuming zinc-rich foods during a cough and cold, prioritise moderation and diversity in your diet. Include lean meats, poultry, sea food, dairy, nuts and seeds. Combine zinc-rich foods with vitamin C sources for enhanced immune support.

Phytates, a substance found in unprocessed whole grains hinder the absorption of zinc, thereby making it less available for the body to utilise. Hence, vegetarians should follow some cooking techniques such as soaking them for 5-6 hours to reduce the phytate content and increase the bioavailability of zinc. Organic acids in fermented foods aid in higher absorption, so always include foods in your diet like buttermilk and yogurt along with some zinc-rich vegetarian sources.

It is important to remember that a higher dosage of zinc supplement inhibits the absorption of other minerals. Therefore, it is always good to check with the healthcare professionals while taking supplements. Stay hydrated, choose cooking methods that preserve zinc, and be aware of factors like phytates affecting absorption.

The Human Genome Project

Pollinators, such as bees, butterflies, birds and bats, are essential for the ecosystem, health and human food security. They facilitate plant reproduction by transferring pollen between flowers, enabling the production of seeds and fruits crucial for plant biodiversity and ecosystem stability.

This mutualistic relationship supports global food production, with approximately 75% of leading food crops relying on animal pollination. Pollinators contribute to the diversity and abundance of flowering plants in natural ecosystems, providing habitat and food resources for various organisms.

Read the given passage and answer the six questions that follow.

The Green Blazer stood out prominently under the bright sun and blue sky. In all that jostling crowd one could not help noticing it. Villagers in shirts and turbans, townsmen in coats and caps, beggars bare-bodied and women in multi-coloured saris were thronging the narrow passage between the stalls and moving in great confused masses, but still the Green Blazer could not be missed. The jabber and babble of the marketplace was there, as people harangued, disputed prices, haggled or greeted each other; over it all boomed the voice of a Bible-preacher, and when he paused for breath, from another corner the loudspeaker of a health van amplified on malaria and tuberculosis. Over and above it all the Green Blazer seemed to cry out an invitation. Raju could not ignore it. It was not in his nature to ignore such a persistent invitation. He kept himself half-aloof from the crowd; he could not afford to remain completely aloof nor keep himself in it too conspicuously. Wherever he might be, he was harrowed by the fear of being spotted by a policeman; today he wore a loin-cloth and was bare-bodied, and had wound an enormous turban over his head, which over-shadowed his face completely and he hoped that he would be taken for a peasant from a village.

He sat on a stack of cast-off banana stalks beside a shop awning and watched the crowd. When he watched a crowd, he did it with concentration. It was his professional occupation. Constitutionally he was an idler and had just the amount of energy to watch in a crowd and put his hand into another person's pocket. It was a gamble, of course. Sometimes he got nothing out of a venture, counting himself lucky if he came out with his fingers intact.

Explanations

1. (*b*) The passage says that combining zinc with vitamin C boosts the immune system.

2. (*a*) In this case, "solution" means a remedy or a way to help with colds.

3. (*d*) The passage talks about zinc's benefits for the immune system, inflammation, and viral infections but doesn't mention hair growth. Therefore, the correct option is Supports hair growth.

4. (*d*) Unimportant. "Pivotal" means important, so the opposite is "unimportant."

5. (*c*) The passage suggests eating zinc-rich foods from both plant and animal sources. Therefore, the correct option is 'a variety of plant and animal foods.'

6. (*a*) "Stay hydrated" means to drink plenty of water to maintain proper hydration. Therefore, the correct option is 'we should have plenty of water.'

7. (*a*) Pollinators transfer pollen between flowers, enabling plant reproduction. Therefore, the correct option is 'transferring pollen between flowers.'

8. (*d*) pollinators and plants. The mutualistic relationship is between pollinators and plants, where pollinators help plants reproduce. Therefore, the correct option is (*d*) pollinators and plants.

9. (*c*) Pollination. The passage mentions urbanization, agriculture, deforestation, and pesticide exposure as causes of habitat loss. "Pollination" is not one of them. Therefore, the correct option is pollination.

10. (*b*) disrupting their behaviour and reproductive patterns. Climate change disrupts pollinators' behavior and reproductive patterns, putting them at risk. Therefore, the correct option is 'disrupting their behaviour and reproductive patterns.'

11. (*c*) The passage does not mention using technology to transfer pollen, so this is not necessary for safeguarding pollinators. Therefore, the correct option is 'using technology to transfer pollen between flowers.'

12. (*b*) "Nesting sites" refers to places where pollinators shelter. "Sheltering" is the best replacement. Therefore, the correct option is sheltering.

13. (*b*) an inflated view of ourselves. Ego refers to one's self-importance and ability to view oneself, but the passage suggests that when ego inflates, it becomes problematic. Thus, it refers to an inflated view of oneself. Therefore, the correct option is 'an inflated view of ourselves.'

14. (*c*) The passage explains that knowing oneself is an advantage, helping with both contentment and relationships. It's an asset, not a liability, because it leads to self-awareness and personal growth. Therefore, the correct option is 'it is an asset.'

15. (*b*) In the passage, the phrase "to start ballooning" refers to ego growing out of control and becoming inflated. This means the ego is increasing in size or importance. Therefore, the correct option is 'to inflate.'

16. (*b*) An inflated ego often leads to a lack of likability and creates problems in personal and professional relationships, as stated in the passage. Therefore, the correct option is 'disliked.'

17. (*d*) The passage clearly discusses how an inflated ego can be detrimental, counterproductive, and lead to issues. However, it does not claim that an inflated ego has a win-win outcome. Therefore, the correct option is 'Inflated ego has a win-win outcome.'

18. (*a*) The passage suggests that regularly seeking feedback is vital for effective leadership, as it helps leaders manage their ego and avoid negative behavior. This practice leads to success as a leader. Therefore, the correct option is 'success as a leader.'

19. (*c*) The correct sequence of the sentence is: People with a high BMI and a genetic predisposition to obesity have a lower risk of heart disease compared to people whose extra weight is related to environmental and lifestyle factors alone. Therefore, the correct option is (B), (A), (D), (C).

20. (*c*) The correct sequence of the sentence is: Despite the enduring belief that 'fresh is best', research has found that frozen, canned, and dried fruits can be just as nutritious as their fresh counterparts. Therefore, the correct option is (C) (B), (D), (A), (C).

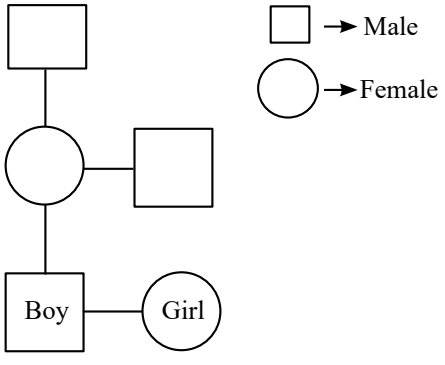
Explanations

1. (*a*)



Thus, the Boy is brother of the Girl.

2. (*d*) 6 Z k B M V d

M ——— N

ϱ ⅀ ⊬ B Ш Λ գ

3. (*c*) The Pattern of the series is:

1 3 9 27 81 243

× 3 × 3 × 3 × 3 × 3

4. (*a*)

Torque → Torrid → Torso → Tortoise → Tortuous.

(iv) (ii) (iii) (i) (v)

5. (*c*) "Fear" emerges when there is "Threat". Similarly, "Anger" emerges when there is "Provocation".

6. (*a*) The clock loses 16 minutes in 24 hr. that means it takes 24 hr 16 minutes where it should have taken 24 hr.

Now, Total hours from 5am from 1st day to 10 pm on 4th day.

$= 24 \times 3 + 17 = 89$ hr

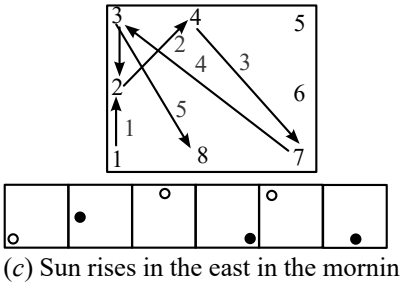
So, in 89hr it loses

$= 89 \times \frac{16}{24} = 59.33 \approx 60\,\text{min} = 1\text{hr}$

So, true time on 4th day is (10 + 1) = 11 pm

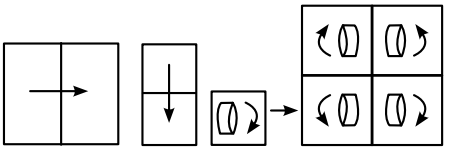
7. (*d*) Logic: Step1: dots are moving according to given arrow

Step 2: dots are filled alternately.



8. (*c*) Sun rises in the east in the morning. Since the shadow of Suresh falls to his right. So he is facing South.

9. (*d*)



10. (*a*) As,

T R I P P L E

−1 −1 −1 −1 −1 −1 −1

S Q H O O K D

Similarly,

D I S P O S E

−1 −1 −1 −1 −1 −1 −1

C H R O N R D

11. (*a*) As, (9 + 28 + 60 + 72) = 169

$\Rightarrow \sqrt{169} = 13$

(24 + 36 + 12 + 9) = 81 $\Rightarrow \sqrt{81} = 9$

Similarly, (41 + 32 + 23 + 48) = 144

$\Rightarrow \sqrt{144} = 12$

12. (*c*) Rate of downstream

$= \left(\frac{1}{10} \times 60\right)$ km/hr = 6 km/hr

Rate of upstream = 2 km/hr.

Speed in still water = $\frac{1}{2}$ (6 + 2) km/hr = 4 km/hr.

$\therefore$ Required time = $\left(\frac{5}{4}\right)\text{hrs} = 1\frac{1}{4}\text{hrs}$

= 1 hr 15 min.

13. (*d*) Let initial price of rice = x

After 50% increases in price of rice

$= \left(x + \frac{x \times 50}{100}\right) = \frac{3x}{2}$

According to questions,

$\frac{60}{x} - \frac{60}{\frac{3x}{2}} = 5$

$\Rightarrow \frac{60}{x} - \frac{120}{3x} = 5 \Rightarrow \frac{180 - 120}{3x} = 5$

$\therefore x = 4$

$\therefore$ New price of rice = $\frac{3x}{2} = \frac{3 \times 4}{2}$

= Rs 6.

14. (*a*) Average = $\frac{n+1}{2} = \frac{49+1}{2} = 25$

15. (*c*) Let cost price of water heater be x

Selling price = $x - \frac{20}{100}x = 3200$

$\Rightarrow \frac{80x}{100} = 3200$

$\Rightarrow x = 3200 \times \frac{100}{80} = 4000$

$\therefore$ New selling price

$= 4000 + 4000 \times \frac{20}{100} = \text{Rs } 4800$
